

Department:	Computing
Scheme of Learning Number:	1
Scheme of Learning Title:	E-Safety
Key Learning:	<p>Students will review e-safety issues as well as identify what they already know about e-safety. Students will learn how personal information can be taken through the use of hackers and virus and how they can reduce the risk of it.</p> <p>Students will reflect on their own experiences, stories they have heard and have the opportunity to express concerns towards technology and use of the internet.</p> <p>They will also learn to use the different packages used in Microsoft Office e.g. PowerPoint, Word, and Outlook. Students will understand the important factors of creating a presentation, whilst focusing on their target audience.</p>
Assessment:	Assessment will be a written assessment including multiple choice questions, scenarios and comparisons at the end of the rotation.
Key Words:	<p>E-safety –Internet safety or online safety is the knowledge of maximizing the user's personal safety and security risks to private information and property associated with using the internet, and the self-protection from computer crime in general</p> <p>Awareness – knowledge or perception of a situation or fact</p> <p>Technology – the use of science in industry, engineering, etc., to invent useful things or to solve problems</p> <p>Virus - a piece of code which is capable of copying itself and typically has a detrimental effect, such as corrupting the system or destroying data.</p> <p>Hacker - a person who uses computers to gain unauthorized access to data.</p>
